 Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                           Score

         Sequence 9493, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF
FILE REFERENCE: CLOO1307
CURRENT APPLICATION NUMBER: US/09/949,016
CURRENT FILING DATE: 2000-04-14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          GENERAL INFORMATION:
APPLICANT: VENTER, J.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 6312, Application US/09949016 Patent No. 6812339

; Sequence 29, Application US/10476570

; Publication No. US20040170644A1

; GENERAL INFORMATION:

APPLICANT: COMMISSARIAT A L'ENERGIE ATOMIQUE

APPLICANT: INSTITUT NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDICALE

APPLICANT: MAILLERE, Bernard

APPLICANT: BOUNGAULT-VILLADA, Isabelle

APPLICANT: BOUNGAULT-VILLADA, Isabelle

APPLICANT: GUILLET, Jean-Gerard

ITITLE OF INVENTION: Mixture of peptides derived from E6 and/or E7

TITLE OF INVENTION: papillomavirus proteins and uses thereof

FILE REFERENCE: 45636-5071-US

CURRENT APPLICATION NUMBER: US/10/476,570

CURRENT APPLICATION NUMBER: PCT/FR02/01533

PRIOR FILING DATE: 2003-11-04

PRIOR APPLICATION NUMBER: FCT/FR02/01533

PRIOR APPLICATION NUMBER: FCT/FR02/01533
